AUTHOR: Ambrose, Timothy J.
UNIT: School of Arts & Letters
TYPE: Chapter
DETAILS (including co-authors, title and publisher): The Goddess, Dionysus and the Material World in Don Quijote in "Objects of Culture in Imperial Spain" published in 2013 by Toronto University Press; edited by Mary Barnard and Frederick A. De Armas. Published in 2013, the above-mentioned book is a collection of scholarly essays by different authors. Each essay appears as a chapter. In my article/chapter, I discuss three objects that either appear in or may be connected to the novel Don Quijote: (1) an enchanted talking bronze head that appears in Chapter 62 of Don Quijote, Part II, (2) a painting by Titian entitled Bacchus and Ariadne and (3) a labyrinth, the ruins of which may still be found on the island of Crete. Linked to these three material objects, the essays overarching theme is that of something non-material: an ancient feminine divinity known by many names, as well as the connections between this feminine divinity and the equally ancient god Dionysus, for Dionysus and the Great Goddess of antiquity were intimately related. My chapter/essay suggests the presence of a number of signs of both Dionysus and the Goddess in Cervantes novel.

AUTHOR: Darnowski, Douglas William
UNIT: School of Natural Sciences
TYPE: Textbook
DETAILS (including co-authors, title and publisher): Question sets for Sinauer's Life the Science of Biology, Sinauer, one of the principal publishers of science textbooks for US university students, brought out a new edition of the longer of their two majors Biology textbooks in 2013 (Life, 10th edition). I was contracted to write all three sets of questions for each of seven chapters (out of fifty nine in the entire book) listed at the end of this description. The types of question sets were: Learning Curve, 75 questions/chapter, posted in online test engine; Diagnostic Quiz, 20 questions, posted in online test engine; Test Bank, 105 questions published in hardcopy book called Test File. I finished editing my submissions, based on reviews, in 2013, and all were published in 2013. I was one of 15 authors for the Test File book, and I wrote one eight of all of the questions for the 10th edition. Chapters for which I wrote: Ch. 29 Evolution of Seed Plants Ch. 34 Plant Anatomy Ch. 35 Transport in Plants Ch. 36 Plant Nutrition Ch. 37 Regulation of Plant Growth Ch. 38 Reproduction in Flowering Plants Ch. 39 Plant Responses to Environmental Challenges

Family-School Communication and Information Preferences among ELL and English-Speaking Parents. Published proceedings of the Midwest Association of Teacher Educators 2012 conference. Abstract: English language learner (ELL) and native English-speaking parents from nine elementary schools, Head Start, and Even Start programs were surveyed about the types of information they desire from their children's schools, and how they prefer to receive school communications. Recommendations of effective ways to communicate with ELL families are discussed.

DETAILS (including co-authors, title and publisher): Reasons Registered Nurses Report Serious Wrongdoings in a Public Teaching Hospital. Psychological Reports: Relationships & Communication (2013), 112 (2), 626-636., Summary: This study examined reasons a registered nurse would report a wrongdoing within a public teaching hospital. Of a group of 238 initial respondents, 30% reported they had observed a wrongdoing in the past year, with 68 nurses indicating they had reported a wrongdoing in the past year. The latter group was the focus of this study. They indicated through a self-report survey that incidents threatening the well-being of patients and their professional ethics were more likely to be reported within their organizations. Observer anonymity was perceived to have a small, but important effect on nurses reporting a wrongdoing in this sample. A manipulation check of the initial 238 respondents revealed a very strong tendency for nurses to overlook a serious mistake by a close peer who had a reputation of being a competent nurse.

DETAILS (including co-authors, title and publisher): Open Journal of Biophysics, Binding of Quinoline-Based Inhibitors to Plasmodium falciparum Lactate Dehydrogenase: A Molecular Docking Study Open Journal of Biophysics, Vol. 3 No. 4, 2013, pp. 285 - 290; DOI: 10.4236/ojbiphy.2013.34034 Abstract: Development of new antimalarial drugs continues to be of great importance due to the resistance of the malaria parasite to currently used drugs. Glycolytic enzymes have emerged as potential targets for the development of new drugs due to the
reliance of the parasite on glycolysis for energy. In this study, molecular docking was used to study the binding of some quinoline-based drugs to the glycolytic enzyme lactate dehydrogenase. The docking studies identified two potential binding sites for each ligand, one of them being the cofactor-binding site. For all ligands studied, there was the comparable binding to the cofactor-binding site as well as the secondary binding site when the cofactor was absent. All ligands showed significantly lower binding affinity than NADH for the cofactor binding site. The alternative site was the site of preference when docking was done in the presence of the cofactor. While binding to the cofactor site may support other studies suggesting potential for competitive inhibition, the fact that the binding affinities of all the ligands are significantly lower than that for NADH in this site suggeststhat these ligands will be ineffective competitive inhibitors. The identification of an alternative binding site with comparable affinity that is not affected by the presence of the cofactor may suggest the possibility of non-competitive inhibition that requires further exploration.

DETAILS (including co-authors, title and publisher): Using smartphones as science laboratory instruments, American Association of Physics Teachers, Portland, July 13-17, 2013 Session: Posters on Apparatus Paper Type: Poster Title: Using Smartphones as Science Laboratory Instruments Meeting: 2013 Summer Meeting: Portland, Oregon Abstract: Smartphones and tablets available today have the computational power for data analysis such as the Fast Fourier Transform as well as built-in sensors such as accelerometers, magnetometers, microphones, speakers, and GPS. With existing apps, portable electronic devices can potentially bring a laboratory experience to the student outside of the classroom or lab. An additional valuable feature of smartphones and similar devices is the headset port which offers a method to communicate with external circuits and sensors, greatly enhancing the potential for use as a laboratory data collection tool. In this presentation we look at the use of mobile devices as laboratory data collection tools and demonstrate simple examples of a smartphone communicating with an external circuit via the headset port.

ROLE:
DETAILS: Paper Topic: The Influence of Jurors Race on Complex Scientific Evidence. Abstract: Complex scientific evidence such as DNA increasingly plays an important role in many of todays courtrooms. The objective of this study is to analyze the influence of jurors race on perceptions of complex scientific evidence. Jury eligible citizens viewed a mock criminal trial involving the presentation of mitochondrial deoxyribonucleic acid (mtDNA). White and African American mock jurors perceptions of mtDNA were measured. Although robust findings were discovered regarding race, results imply that an educational background in science and math is important. The present study has shown the negative impact that low levels of science and math courses have on...

ROLE:
DETAILS: Paper title: The Politics of Capital Jury Verdicts: The Importance of Mitigating and Aggravating Factors Abstract: The jury plays a central but controversial role in the American legal system. Its praised by many as a bulwark of freedom and democracy. It has been proposed that jurors may decide their verdict based on emotion, as opposed to the evidence presented during the trial and judicial instruction. The present study analyzes the significance of mitigating and aggravating factors in capital cases. In-depth interviews were conducted with actual capital jurors in Pennsylvania, as part of the Capital Jury Project. Factors influencing jurors sentencing decisions, such as the weight attributed to mitigating and aggravating circumstances.

DETAILS: Caballos salvajes: Anarchy, Freedom and Truth. A paper presented at the U of L Conference on Latin American Cinema: Reel Latin America: Framing the 21st Century; the conference was held in conjunction with the U of L 20th Annual Latin American Film Festival. In my paper, I discussed how the Argentine film, Caballos salvajes [Wild Horses] calls into question constructs of reality that contemporary civilized societies accept incontrovertibly as truths. In the film, a man of anarchist tendencies, Jos, challenges the Argentine banking system with a quixotic gesture that becomes the point of departure for a flight into freedom. The epithet indomables (untamed) used to characterize Jos and his initially reluctant a...

DETAILS: The Common Core and Curricular Enclosure: An Autonomist Reconceptualization of Standards and Accountability. Abstract-This paper offers a critique of the theory of common operating with the Common Core State Standards Initiative. Drawing from work in autonomist Marxism and critical curriculum theory, the authors argue that the CCSS constitutes an example of curricular enclosure. In response, they offer a counter-theorization of common that is averse to standardization and hierarchial models of accountability, and is instead predicated upon a common that opposes the subsumption of student subjectivity into the logics of human capital and surplus-value production. 10/18/2013, Dayton OH, United States

AUTHOR: King, Granville
This study examined reasons a registered nurse would report a wrongdoing within a public teaching hospital. Of a group of 238 initial respondents, 30% reported they had observed a wrongdoing in the past year, with 68 nurses indicating they had reported a wrongdoing in the past year. The latter group was the focus of this study. They indicated through a self-report survey that incidents threatening the well-being of patients and their professional ethics were more likely to be reported within their organizations. Observer anonymity was perceived to have a small, but important effect on nurses reporting a wrongdoing in this sample. A m...

AUTHOR: Kasceio Niles, Matthew Cox EMAIL: kasniles@ius.edu, cox22@ius.edu TITLE: How is antibiotic resistance maintained in the environment"FACULTY SPONSOR: David Treves DISCIPLINE: Biology

To address how antibiotic resistance persists in the environment we examined the gut microflora of marsh rice rats that have been reared free of antibiotics for over ten years. In two experiments rat feces was inoculated in liquid nutrient broth
containing ampicillin and incubated at 37°C. Isolates from the culture were purified, identified, and tested for antibiotic resistance. Enterobacter, Klebsiella and suspected Psu...

TYPE: Conference
ROLE: Discussant

DETAILS: This three-day conference provides an opportunity to critically examine perspectives on human-environment relationships in their varied manifestations and to foster discussions among a diverse group of scholars. I was the discussant for the session Technology as an Interface of Human-Environment Interaction 1 that included: Technology Diffusion in Liberia: Introducing the Caltech Expeller; Infrastructural Drift and the Undiscussed: From Green Machines to Disaster Alert Systems; Greywater, Green Technology, and the Criminalization of Residential Water Reuse and Storage; Bioenergy Futures: Framing Sociotechnical Imaginaries in Local Places. 2/28/2013, University of Kentucky, United States

UNIT: School of Social Sciences
TYPE: Presentation

ROLE:
DETAILS: Discerning Fact from Belief in an Undergraduate Research Methods Course
Critical thinking is a key feature of a liberal arts education. One of the central tenants and defining characteristics, of critical thinking is learning to distinguish conclusions that are evidence based from those that are belief based (Stassen, Herrington, and Henderson, 2011). Preliminary findings from course assessments performed by the authors indicate that students have great difficulty with distinctions between fact and belief. Using the findings as a point of departure, this roundtable offers a space in which to discuss: (1) problems instructors have with helping students identify fact from opinion/belief, (2) developmental and ideological barriers to...

UNIT: School of Education
TYPE: Presentation

ROLE:
DETAILS: Conference Theme: Erasing the Shadows, Embracing the Light: Re/visioning Multicultural Education.

Giving honor to who our students are, valuing their experiences. Realizing that teaching is a reciprocal relationship. ALL of our students come to school with rich foundations and experiences. Teachers can only build on this foundation if they tap into it. Through the work of Ladson-Billings, Villegas, Bowers and Flinders, Gay and many others, we understand that importance of providing instruction in ways that tap into the
learning styles and strengths of our students but what does that look like in
action. This session provided practical examples of Culturally Responsive Teaching
in action using literature such as Esperanza Rising. Culturally responsive teaching is
providing instruction...

TYPE: Competitive Paper
ROLE: Presenter
DETAILS: Paper on the textual and technical problems of editing a set of letters written at a time of border closings and severe censorship. Letters in WWI
constitute part of what we may call alternative or counter publics, i.e. an alternative public sphere that comes to stand in for the inoperative (main) public sphere and includes semi- or inofficial communication, such as letters, flyers, notes, underground publications, and the like.

3/7/2013, Chicago, IL, United States

***********************************************************************

AUTHOR: Zorn, Christa
UNIT: School of Arts & Letters
TYPE: Competitive Paper
ROLE: Presenter
DETAILS: Peer selected paper for the Shaw at Home conference in Ayot St. Lawrence (Shaw's former home) near London. In this paper I discuss Shaw's late plays, which have been disparaged as weak or politically misleading. The example I used was Shaw's 1938 play Geneva. The title of my paper: Geneva--or the Failure of Language. The argument shows that we need to read the play in the context of recent historical controversies (including the German Historikerstreit) and to employ non-traditional interpretive strategies that include gesture, movement, textual movement to set off the inappropriately flippant representations of political dictators--frightfully real in those days.

CREATIVE ACTIVITY

AUTHOR: Abernethy, Michael Lee
UNIT: School of Arts & Letters
TYPE: Performance
ROLE: Performer

AUTHOR: Brewer, Neil H.
UNIT: School of Education
TYPE: Digital Media
ROLE: Producer
DETAILS: Mr. Bob Williams, Director of "Ranch Hand Rescue" in Dallas, Texas, requested that I write and perform a song to accompany scenes of children and adults with the animals rescued from abuse through his organization. Ranch Hand Rescue saves abused animals of all kinds, especially severely abused horses. The ranch has been internationally recognized for its "ahead-of-its-time" medical procedures, and the world's first successful prosthetic leg for a horse was achieved by the organization. In turn, these animals then serve as inspirations to children and adults who have severe physical impairments. Thus, the song was written and utilized in a video for Youtube and other digital media to raise awareness for this effort, and it features many scenes of special needs children who have made life-long connection.
