

MIS Seminar Core Competencies

Program Mission

Students who have completed the MIS program will demonstrate:

- understanding of the methods of intellectual inquiry in *multiple* disciplines
- development of *broader* knowledge base with sufficient depth
- improved ability to *critically* analyze information
- ability to *synthesize* knowledge to examine complex issues
- capacity to apply learning to make *informed* decisions
- ability to *communicate* effectively

Core Competencies

- Identification of the interdisciplinary, multidisciplinary, and international nature of the topic.
- Scholarly level knowledge through reading of primary (research and creative works) and secondary texts (critical, historical, and theoretical treatises).
- Extensive, critical, and constructive student participation in class discussion.
- Ability to do graduate level critical and analytical thinking, including:
 - Finding, analyzing, and evaluating important concepts
 - Evaluating quality and accuracy of evidence
 - Identifying and critically evaluating intellectual and cultural/contextual issues
 - Demonstrating awareness of multiple approaches and their validity
 - Developing one's own critical approach based on knowledge of the field
- Ability to synthesize information from multiple approaches to examine complex issues.
- Completion of individual graduate level written and oral communication of learning:
 - Written papers that present critical and synthetic analysis of the topic
 - Oral presentations that convey the central tenets and specific issues

Adopted: 27 February 2008
