

***IU Southeast Graduating Student Survey:
Enrollment Management Report***

BACKGROUND

The Indiana University Southeast Graduating Student Survey is administered to students when they apply for graduation and collects data regarding post-graduation plans, employment and income, applied learning experiences, factors influencing student satisfaction with their experiences at IU Southeast, diversity and culture, campus safety and self-perceived levels of abilities. This multi-year report is intended to provide information regarding how these data have changed from year to year and to support decision-making that facilitate change in response to the dynamic needs of the student population.

Individual question response rate varies. We include partial responses in the report and, unless otherwise indicated, non-respondents are excluded in tabled data counts and percentages

When graduate and undergraduate responses are combined, the largest annual gross salary category remains under \$25,000. However, when comparing the two groups, the differences are striking but not unexpected. Almost two-thirds of the undergraduates fall in the under \$25,000 category with all other categories under 10%: while approximately half of all graduate respondents earn \$50,000 or more, and a large 15% earn \$80,000 or more per year.
