DETAILS (including co-authors, dates, and location of presentation): Anderson, Virginia. Always with Us: Death, Taxes, and Division. 8th Triennial Conference of the Kenneth Burke Society. Clemson University, Clemson, South Carolina. 27 May 2011.The trend in biology to accept group selection as one of the ways evolution works has opened the door for faith that altruism can arise and survive in human as well as other living populations, since groups with a critical mass of altruistic members outcompete more competitive groups. But studies of how altruism functions in biological scenarios raise a troubling question that Kenneth Burke recognized long ago. The existence of groups whose members behave altruistically toward each other, for the good of the group, is predicated on perceived similarity among group membersthat is, identifi, ,

DETAILS (including co-authors, dates, and location of presentation): Nicholas Phillips: Design and implement adaptive solutions based on evolutionary and neural network approaches for digit recognition problem, 2011.Abstract:We can use Genetic Algorithms(GA) and Artificial Neural Networks (ANN) to design software applications that reads and learn to recognize hand written numbers. GAs and ANNs are innovative techniques of training machines to analyze and recognize objects as humans do. We propose to introduce a more efficient adaptive algorithm for solving digit recognition problem by using a blend of

approaches available within the GA and ANN techniques. We expect our approach to produce improved results compared to the current rate of success., 1/1/2011, IU Southeast

DETAILS (including co-authors, dates, and location of presentation): Randall Heidorn, Greg Reinhardt, Nathaniel Biefeld, and Ryan Hughes: Distinguishing and Characterizing Objects in An Environment Through Sensor Modalities Using Bayesian Methods, 2011. Abstract: Our group was tasked with the topic of distinguishing and characterizing objects in an environment through sensor modalities using Bayesian methods. That means that we wanted to be able to use robots (varying from one to four) to take a probabilistic guess at identifying an object. The end goal of the project is to be able to identify various objects with a high probability of correctness, and if that is not possible, then to be able to give our best guesses as to what that object could be (along with the corresponding probability of correctness). We believed that with a combina, ,

DETAILS (including co-authors, dates, and location of presentation): Colton Jenkins: Adaptive mine sweepers in dynamic environments, this work is ongoing, 2011. We can utilize Neural Networks (NN) multiple ways to find solutions to different problems. We train a NN combined with a Genetic Algorithm (GA) to produce an optimized solution to the minesweeper problem. The minesweepers move on a 2D grid environment looking for mines. The NN in each of the minesweeper takes in the current direction the minesweeper is heading and outputs the optimal force required to turn towards a mine. In this work, we demonstrate two concepts; neural networks and genetic algorithms in the context of minesweeper application and present an analysis., 1/1/2011, IU Southeast

TYPE: Conference

ORGANIZATION: The Louisville Conference on Literature and Culture since 1900

DETAILS (including co-authors, dates, and location of presentation): I chaired a session on francophone film for the 39th edition of this international conference, involving three presentations relating to works by Palcy (Rue Cases-negres), Kassovitz (La haine) and Godard (Made in USA). The individual topics of the

presentations varied from a discussion of Negritude and identity, to the use of language and the message it relayed, to the Brechtian elements in a seminal work from the late 1960s., 2/24/2011, Louisville, KY

AUTHOR: Pooser, Charles Langdon

UNIT: School of Arts & Letters

TYPE: Presentation

ORGANIZATION: 2011 Federation of Alliance Francaises Annual Convention

DETAILS (including co-authors, dates, and location of presentation): As part of a series of all-day teacher development workshops with a number of teachers of French from both Kentucky and Indiana in attendance, I presented an interactive session on the pedagogical work that I have done in developing a series of introductory lessons that combine both the basics of French phonetics and an introduction to the French-speaking world beyond Europe., 10/28/2011, Louisville, KY

ORGANIZATION: Ubiquitous Learning: An International Conference 2011

DETAILS (including co-authors, dates, and location of presentation): Mobile
electronic devices offer the potential for extending the physical bounds and the
spirit of inquiry in science education. The goal of science education is for students

to learn to think like a scientist, which means learning how to do science, which often means doing experiments. Traditionally, science education relies upon scheduled experiments in a school lab, even though many engaging experiments can be created and performed by students outside of a specific time or location. Mobile devices, such as smart phones, can measure sound, light, acceleration, position, barometric pressure, and other phenomena, allowing students to perform a range of experiments whenever and wherever they choose. Smart phones also have the computational power to anal, ,

The first paper was titled Primary Attraction: The Dimensions of Candidacy for Women in State Legislative Elections. The second paper was titled Exploring the Impact of

Professionalism on Campaign Contributions to Male and Female State Legislative Candidates., 6/2/2011, Hanover, New Hampshire

AUTHOR: Zorn,Christa

UNIT: School of Arts & Letters

TYPE: Competitive Paper

ORGANIZATION: Comparative Drama Conference

DETAILS (including co-authors, dates, and location of presentation): The argument of the essay focuses on Shaws representation of the public sphere in World War I. It is an investigation of scale. In other words, the play demonstrates that the large scale of public events is not comprehended by the British public since the public discussion functions as a private drawing room discussion of Little Englanders. The essay draws on Shaws major play during the War, as well as on the preface and political writings during that time period. The theoretical framework for the public sphere is based on writings by Richard Sennett, James Bohmann, and Hanna Ahrend., 1/1/2011, Los Angeles
