AUTHOR: Camahalan, Faye Marsha

UNIT: School of Education

TYPE: Workshop

ROLE:

DETAILS (including dates of performance, if applicable): Best Practices for Bright Futures: Workshop on Diversity presentation title: Exploring differences in thinking: How much of my culture influences the way I think" One would need to learn 28 unique words to count up to 100 in English while in any Chinese dialect, Japanese, or Korean, one only needs to learn 11! Students in the first world countries have developed advanced social skills to talk their ways out of trouble. Native English speakers have an advantage in most standardized tests! Second language speakers are more prone to cognitive overloading when presented with impromptu discussion. The goal of this session is to help teachers design instruction on the firm foundation of all children can learn to improve children's thinking abilities, as well as their abilities, , ,

AUTHOR: Carducci, Bernardo J.

AUTHOR: Fredrickson, Laurel Jean
UNIT: School of Arts & Letters
TYPE: Conference
ROLE:

DETAILS (including dates of performance, if applicable): Had session proposal accepted: Enlivening the Survey. Call for Papers: The question of how to teach The Survey has been much debated. Some art historians teach the course thematically, introducing a limited number of art works and monuments. But the

traditional approach, presenting art across time through numerous works prevails. Many instructors value giving students a sense of the scope of art s development (Western, Non-Western, or Contemporary), presenting artworks in relation to historical, cultural, social, political, and economic circumstances. With its broad scope the developmental approach can mitigate (if not solve) the problem of who should be included, allowing for inclusion of those marginalized by the canon, such as women and people of color. But to teac, , ,

UNIT: School of Social Sciences
TYPE: Poster Session
ROLE:

DETAILS (including dates of performance, if applicable): Title: Olfactory Enhancement of Memory Research in humans has demonstrated a relationship between olfaction and memory (Devanand, Michaels-Marston, Liu, Pelton, Padilla, Marder, Bell, Stern, Mayeux, 2000; Schab, 1990; Zoladz Raudenbush, 2005). Pigeons may serve as a good comparison species as they use olfactory cues for spatial memory tasks in the field (Benvenuti, Fiaschi, Fiore, Papi, 1973; Wallraff, 2004) and they rely on the same brain structure for learning as humans (Colombo Broadbent, 2000). The current study examined the use of olfactory cues and memory in pigeons in a laboratory setting. Pigeons were given a one-trial learning task that involved memory for food location under different odor conditions (clove bud, lavender, a , ,

AUTHOR: Kahn, Meghan C
UNIT: School of Social Sciences
TYPE: Poster Session
ROLE:

DETAILS (including dates of performance, if applicable): Title: Conditional discrimination in the homing pigeon
A. Problem or Major Purpose: Single cells in the avian hippocampal formation (HF) respond to a combination of location and what occurs at locations (Hough Bingman, 2008) and HF lesions impair the ability of pigeons to choose high value food locations over lower value food locations (Kahn Bingman, 2009). Data showing that HF represents the what and where of events could reflect episodic-like memory in pigeons or an associative learning mechanism. The current study investigated the possibility of an associative learning explanation.
B. Procedure: Two pigeons were repeatedly trained on a conditional discrimination task where the correct food bowl was determined by color of a curtain that covered room wall, , ,

Submission Abstract: Previous research has shown that

high school students find science a cold, impersonal field that lacks passion (Miller, Blessing, Schwartz, 2006). Most students are not interested in pursuing science as a career, perhaps because they believe that scientists are very different from themselves (Miller et al., 2006; Ramsay, Logan, Skamp, 2005). Despite these negative views, psychology students are required to complete coursework in scientific methods and how they are applied to the field of psychology. In order to promote broader, more inclusive views of scientists, students in, , ,

reviving history. In James McPherson's words, Revision is the lifeblood of historical scholarship. (From the Presidents column of the September 2003 Perspective.) Changing interpretations of the past can be due to new evidence that may broaden, sharpen and even alter the existing narrative and understanding of a certain event or period. Revision can also occur because of passage of time with younger generations asking different questions. Additionally, changing social, economic and political contexts can lead to different considerations, , ,

ROLE:

DETAILS (including dates of performance, if applicable): Poster presentation at student conference:Title: How is antibiotic resistance maintained in the environment"ABSTRACT: To address how antibiotic resistance persists in the environment we examined the gut microfloraof marsh rice rats that have been reared free of antibiotics for over ten years. In two experiments rat feces was inoculated in liquid nutrient broth containing ampicillin and incubated at 37C. Isolates from the culture were purified, identified, and tested for antibiotic resistance. Enterobacter, Klebsiellaand suspected Psuedomonaswere found in the samples, and all isolates showed multiple drug resistances. Preliminary results suggest that the isolated colony of marsh rats maintain multi-drug resistant bacteria, even without the selective pressure of a , ,

UNIT: School of Social Sciences

TYPE: Book

DETAILS (including co-authors, title and publisher): The Effect of Jurors? Race and Education on Attitudes toward Complex Scientific Evidence, Complex scientific evidence such as DNA increasingly plays an important role in many of today's courtrooms. The objective of this book was to study and analyze the influence of jurors' race on perceptions of complex scientific evidence. Jury-eligible citizens viewed a mock criminal trial involving the presentation of mitochondrial deoxyribonucleic acid (mtDNA). White and African American mock jurors' perceptions of mtDNA were measured. Although robust findings were discovered regarding race, results imply that an educational background in science and math is important. The study has shown the negative impact that low levels of science and math courses have on perceptions of scientific evidence. Courtroom evidence will only continue to become even more complex in the future. The importance of scientific literacy and jury reform is discussed.

August 2012. 2012 Annual Evaluation: New Albany, Floyd County 21st Century Community Learning Centers. New Albany, IN: Indiana University Southeast Applied Research and Education Center. Students provided data management support in compiling data from the three 21st Century Community Learning Center sites. The Annual Evaluation documents

performance of the New Albany Floyd County School Corporations three 21st Century Community Learning Center sites. The evaluators measure school and district performance against the goals included in the 2011-2012 Objectives. Each school demonstrates strengths and weaknesses that may form the basis of program planning for the 2012-2013 school year. The evaluation recommends that sites that performed particularly well in an area share their knowledge to help other sites improve performance in the coming year.

Payday Loans Drain Community Resources: Borrowers Do Not Recommend Them to Others in Need. New Albany, IN: Indiana University Southeast Applied Research and Education Center. An AREC student worked with the Kentucky Coalition for Responsible Lending and me to construct a survey of social service recipients about payday loan use and the impact of such loans on their need for emergency social services. Service agencies administered the surveys and we entered the data, analyzed the results and wrote a short research brief and fact sheet. These items were presented to the Banking and Insurance Committee of the Kentucky House of Representatives during the 2012 legislative session.

New Albany, IN: Indiana University Southeast Applied Research and Education Center. This preliminary report compiles data from a study assessing the 40 developmental assets in Decatur County, Indiana and national figures for these assets. The preliminary report allowed Community Action Coalition

members to place their local findings in the context of national averages to help them identify key areas of relative strength and relative weakness.

TYPE: Report

DETAILS (including co-authors, title and publisher): Assessing Needs and Perceptions on the Backside, Applied Research and Education Center. August 2012. Assessing Needs and Perceptions on the Backside. New Albany, IN: Indiana University Southeast Applied Research and Education Center. The AREC was hired to conduct an assessment of perceptions and needs on the backside at Churchill Downs. The AREC team, in consultation with the Backside Learning Center (BLC) Board of Directors and the Education Subcommittee of that Board, constructed a trainer survey and a horseman survey. Students did background research on services provided at other racetracks to provide reference points for the BLC Board. Seven IUS students entered the field and conducted 40 trainer surveys and 154 horseman surveys over a two month period during the spring meet at Churchill Downs and Trackside Training Facility. Students compiled data and generated descriptive statistics. Subgroups were insufficient in size for more detailed analyses, but the descriptive statistics provided ample information to shape strategic planning and future program at the Backside Learning Center.

DETAILS (including co-authors, title and publisher): Counseling Needs and Acculturation Processes Among Immigrant Students at Jefferson County Public Schools ESL Newcomer Academy, Podikunju-Hussain, S., Hoffman, L. (2012).

Counseling Needs and Acculturation Processes among Immigrant Students at Jefferson County Public Schools ESL Newcomer Academy (Research Report for Jefferson County Public Schools). This is a report to Jefferson County Public Schools and the JCPS ESL Newcomer Academy of a research project undertaken in 2012. The purpose of this study is to find out the needs of immigrant adolescents especially in regard to areas they feel are most problematic for them in the adjustment and acculturation process. The ESL Newcomer Academy is a Jefferson County public school serving immigrant students in grades 7-12. Participants range in age from 12-18 years. The intent of this study is that the results will help identify the needs faced by the immigrant student in the acculturation process. It will also help reveal how immigrant adolescents at the Newcomer Academy acculturate to life in the United States, especially in relation to a popular theoretical model of immigrant acculturation (Berry, Phinney, Sam, Vedder, 2006). It is the researchers intention that Newcomer Academy administration and planning teams can use any data from this study to inform future school counseling services, interventions and advocacy for students, and other partnership opportunities. Results will also contribute to the field of counselor preparation and help school counselors as they expand their knowledge about the problems of and need for interventions about this group of minority individuals.

DETAILS (including co-authors, title and publisher): Journal of Knowledge & Human Resource Management, 4(8), 73-87., The Other Side of Whistle-Blowing: Examining the Effects of Narcissism on Whistle-Blowers Behavior. Who blows the whistle and why is a question that has intrigued whistle-blowing scholars for years. In order to address this significant question, much attention has been devoted to examining the personality of whistle-blowers and potential whistle-blowers. This study sought to expand the whistle-blowing personality literature by examining the effects of narcissism on whistle-blowers behavior. Using the literature from the American Psychiatric Association, the paper explores how

characteristics associated with narcissism, and narcissistic whistle-blowers, may interact with the complaint recipient, coworkers, and members of upper-management. The paper concludes by offering suggestions for expanding the literature on whistle-blowing and narcissism.

An area of the francophone world with strong and quite unique historical connections to the United States, Haiti and her rich culture have only been superficially exploited in the study of French language and francophone culture. This article argues for not only including, but privileging the study of Haiti

in courses focusing upon francophone culture. Several pervasive aspects of Haitian culture are treated, with ideas for classroom activities and readings. So full of potential for stimulating the interest of American students, Haiti should be neglected no longer.

ABSTRACT: Utilizing the responses from 379 police officers from 9 southern and

southwestern agencies, this study investigates the interaction between police stress and transformational leadership on burnout in a high risk-occupation. Results indicate police stress exacerbates perceived burnout. Transformational leadership influences this relationship such that high levels of perceived transformational leadership attenuate the negative relationship between stress and burnout, but less so under highly stressful conditions.

AUTHOR: Setterdahl, Aaron T
UNIT: School of Natural Sciences
TYPE: Conference Proceedings

DETAILS (including co-authors, title and publisher): 14th International Symposium on Phototrophic Prokaryotes in Porto, Portugal, Miralem Bekric, Angela Whitaker, Cameron Unverferth, Young-Won Christine Kim, and Aaron Setterdahl, Identification and characterization of unknown genes in Rhodobacter sphaeroides, ISPP 2012: 14th International Symposium on Phototrophic Prokaryotes, August 5th-10th 2012, Porto Portugal. Abstract Genome sequencing of thousands of organisms has resulted in databases of gene sequences that code for many previously unknown proteins. Sequence analysis of the photosynthetic bacterium Rhodobacter sphaeroides genome reveals several uncharacterized proteins that are highly conserved among many bacteria and have yet to be characterized. Genes that have probable, hypothetical, or no known function have been targeted for this study to be systematically validated for function. One such gene, RSP_2415, has more than 90% sequence identity to a gene of unknown function also found in hundreds of organisms. BLAST analysis reveals two domains of unknown function DUF-404 and DUF-407. DUF-404 is predicted to be structurally similar to a putative glutathionylspermidine synthase. The gene encoding RSP_2415 has been cloned and expressed to validate the

glutathionylspermidine activity. This would be the first time glutathionylspermidine synthase activity is characterized in a photosynthetic prokaryote.

DETAILS (including dates of performance, if applicable): Project Title: Waiting for Godot
Design credits: Scenery, Lighting, Costumes
Produced for Indiana University Southeast, Theatre Department
Ogle Center; Robinson Theatre
Director: Jim Hesselman
Progress Report: In April of 2012 the IUS theatre department mounted a production of Waiting for Godot. Waiting for Godot, is the classic existential absurdist play by Samuel Beckett. It begins as it ends; two men waiting endlessly for a friend which never comes. While waiting the two men, Vladimir and Estragon, eat, sleep, talk to a pair of passers-by, and discuss the meaning of existence. The play is set on the side of small country road over the course of two

days. After discussions with the director, we agreed that we wanted to stay very true to the traditional staging of the show; the

DETAILS (including dates of performance, if applicable): Project Title: The Fantasticks
Design credits: Scenery, Lighting
Produced for Indiana University Southeast, Theatre Department
Ogle Center; Robinson Theatre
Director: Jim Hesselman
Progress Report: In March of 2012 the IUS theatre department mounted a production The Fantasticks with music by Harvey Schmidt and lyrics by Tom Jones. The Fantasticks is very loosely based on the play The Romancers. Two young neighbors are tricked into falling in love by their fathers thru a long planned out deception. Only after failing in love and then out of love, the two young lovers see the world as it is instead of thru the fantasy that they had made it out to be. After returning home both find themselves more mature and ready to love each other once again. The play is set in numerous locations wi

DETAILS (including dates of performance, if applicable): Project Title: Blues for an Alabama Sky
Design credits: Lighting
Produced for University of Louisville, African American Theatre Program
U of L, Thrust Theatre
Director: Nefertiti Burton
Progress Report: In February of 2012 the University of Louisville's African American Theatre Program (AATP), mounted a production of Pearl Cleage's Blues for an Alabama Sky; set in two apartments in the 1930's Harlem Renaissance. Following the lives of African- American artists, musicians, and friends, the play tells the story of love, loss, and self-discovery. After numerous discussions with the director, Nefertiti Burton, we decided the lighting should stay true to the naturalistic scenery designed by Charles Nasby. For this production I completed full designs for the area of Lighting. This desi

DETAILS (including dates of performance, if applicable): Project Title: Urinetown
Design credits: Scenery, Lighting
Produced for Indiana University Southeast, Theatre Department
Ogle Center; Robinson Theatre
Director: Jim Hesselman
Progress Report: In November of 2012 the IUS theatre department mounted a production of Mark Hollmann's Urinetown. Urinetown is a satirical musical comedy with music by Mark Hollmann, lyrics by Hollmann and Greg Kotis, and book by Kotis. In a world where water is more valuable than gold, we see a small band of people who are forced to use the most abhorrent of public pay toilets. As the fees are raised, so goes the people's anger. From out of this group steps of an unlikely hero who tries to rise up against the crooked corporate conglomerate which runs the pay toilets. After numerous discussions with the direc

TYPE: Musical Production

ROLE: Other

DETAILS (including dates of performance, if applicable): I have worked to promote the music department on campus and encourage students to attend

performances and join musical groups on campus. I organized a group of seven of students and faculty to attend the Commonwealth Brass Band on March 11th. I attended the Guitar recital of faculty member Andrew Reinhart with two students. I attended one different drummer series program with one student. I attended one IUS play in 2012. I have succeeded in convincing four different freshman students to come to concert band performances. I have advised several students to successfully join the IUS pep band. I have advised one student to try out and be accepted into the IUS concert band.

AUTHOR: Vernia, Mildred A.

UNIT: School of Natural Sciences

TYPE: Musical Performance

ROLE: Performer

DETAILS (including dates of performance, if applicable): In January, I auditioned and was accepted to the IUS concert band. It took years of practice and lessons to get to this level. I take lessons on campus every week. I play the clarinet. I have encouraged several students to audition and currently enjoy three former students who play in the Concert band with me. We rehearse from 7 PM until 9PM on Thursdays during the fall and spring semesters. There are 14 rehearsals a semester or 28 in a year. The larger time commitment is the time it takes to practice at home. The music is challenging even for the professional musicians in the band. Performances are in the Ogle Center 2 or three times a semester.
