AUTHOR: Abshire,Jean

UNIT: School of Social Sciences

TYPE: Chapter

DATE: 1/1/2014

DETAILS (including co-authors, title and publisher): Abshire, Jean E. (2014) Critical Thinking in College Success Guide. Donna Dahlgren, ed. I almost completely re-wrote the Critical Thinking chapter in the College Success Guide used in First Year Seminar classes at IU Southeast. I removed some of the content focused on applying critical thinking skills to students own written work and instead replaced it with several alternative items: I added a graphic that applied critical thinking to the natural sciences. I added 2 analytical exercises that were also based on graphic images. The earlier version of the chapter had focused solely in critical thinking as applied to text, reading and writing. However, this generation of students is in undated with graphic images, especially through social media and it is important to train them to critically think and analyze other media than the written word. I also added a section on applying critical thinking to life choices. Specifically, I added a section talking about life decisions such as should I transfer to another college. This section offered variables to research and consider in making that decision. Moreover, I also integrated research from the Purdue-Gallup study (released in May 2014) about what factors relating to the college experience led to success in life and work across a large data set of college graduates.

To Render Invisible: Jim Crow and Public Life in New South Jacksonville. By Robert Cassanello. (Gainesville and other cities: University Press of Florida, c. 2013. Pp. [xiv], 188. \$74.95, ISBN 978-0-8130-4419-4.) After the review came out, the reviewee wrote me the following: Thank you for the kind and fair review. I use to take reviews for granted, but I have seen another review of the book and I am not sure that person even read it before trashing it. I am going to keep an eye out for your book when it comes out so I can check it out. Good luck. Abstract Presented here is the whole-genome sequence of a previously uncharacterized species of the genus Planococcus. A 16S sequence analysis shows that this bacterium exhibits 98% sequence identity to the closest relative of Planococcus kocurii. Whereas most species of Planococcus produce yellow to orange pigments, the species described here produces black pigmentation. It is praised by many as the bulwark of freedom and democracy. It has been proposed that jurors may decide their verdict based on emotions, as opposed to the evidence presented during the trial and judicial instruction. The present study analyzes the influence of jurors emotion in determining punishment in capital cases, as with the level of brutality associated with the crime, victim suffering, and defendant empathy. Further, the influence of race and gender will be explored. In-depth interviews were conducted with Pennsylvania capital jurors as part of

By design, research methods courses reinforce a seemingly unavoidable situation of content tyranny, or the practice of presenting too much material in the college classroom (Weimer, 1993). This often results in overwhelmed instructors and easily disengaged students. Our presentation will explore the balance between achieving many course objectives while simultaneously enhancing student success.

This presentation will examine the exclusion of women from public space through the creation of symbolic borders and gendered space in the safety discourse of a large public university. The research uncovered a deep encoding of conventional notions about a womans place and an apparent attempt to intentionally cultivate fear and restrict womens public behavior and movement. The analysis examines the marking of safe and unsafe space for women through maps, safety advice and geographical enhancements on the university campus which unify and divide by gender as they mark appropriate space for women. One of the more important consequences of this segregation is uneven access to resources. This analysis po

Safety advice is dominated by imaginings of public space as shadowy places dominated by ambiguous lurking evil. At best, safety advice often amounts to a modern retelling of Little Red Riding Hood: a girl shouldnt go out in to the dark scary world alone or a strange scary man will attack her. Images of violence against women from evil, shadowy and unpredictable men abound in popular culture; the lunatic and the sociopath lurking in dark, unsupervised, public places. Women are bombarded culturally and formally by the prospect and consequences of lurking violence and the notion that being female means
